

# Improve Access for All Texas Families

K12 Insight provides real-time assistance in Spanish with Let's Talk Assistant, an AI-powered, always-on chatbot — the first of its kind built specifically for K-12 school districts.

This tool enables English language learner (ELL) families to get immediate answers to questions and receive a high level of service in their preferred language.

## Simplify Access for All

Simplifying access to information via channels such as calls, texts, chat, and email helps to bridge the digital divide and better serve students and families.

## Strengthen Community

Let's Talk helps school districts ensure inclusivity by providing automatic translation in up to 13 languages (with additional language options available upon request).

## Translation at Your Fingertips

For correspondence that requires a human touch, Let's Talk! empowers your staff to communicate confidently with ELL families with real-time automatic translation.

1 in 3

households in Texas speak a language other than English at home
