

# Improve Access for Spanish-Speaking Families

K12 *Insight* provides real-time assistance in Spanish with Let's Talk! Assistant, an AI-powered, always-on chatbot — the first of its kind built specifically for K-12 school districts.

This tool enables Spanish-speaking families to get immediate answers to their questions and receive the same high level of service in their preferred language.

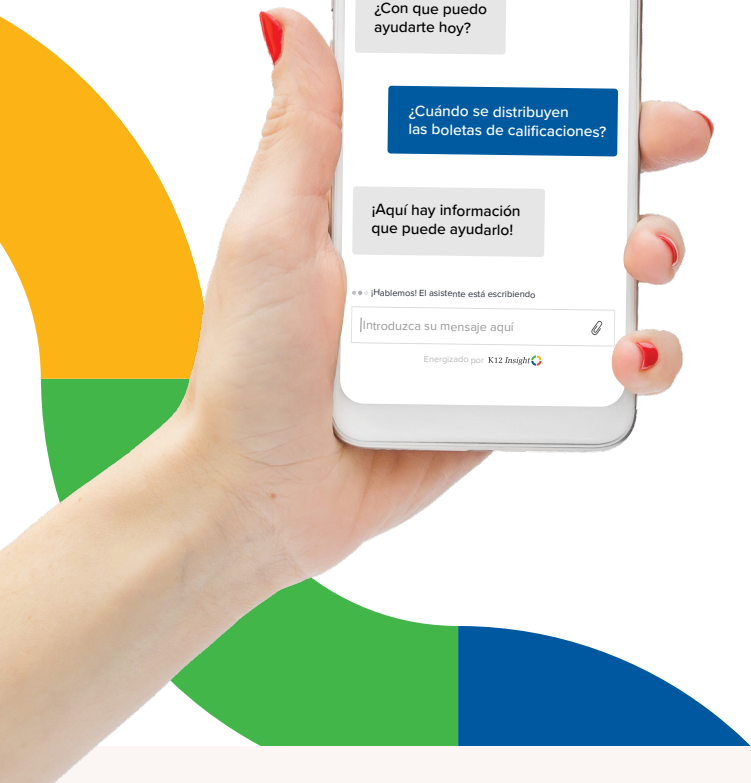

## Close the Digital Divide

Ensuring equal access to high-speed internet, particularly for marginalized groups, remains a challenge for school districts. Offering tools like Let's Talk! on instant communication channels such as calls, text messages, and email helps bridge the divide and create stronger connections.

## Strengthen Inclusivity

Let's Talk! helps school districts be more inclusive to families by providing translation tools that can translate dialogues in up to 13 languages by default (with additional language options available) and Spanish language capabilities with the Let's Talk! Assistant chatbot.

# Translation at Your Fingertips

For correspondence that requires a human touch, Let's Talk! empowers your staff to communicate confidently with Spanish speakers with real-time automatic translation.

Set up a demo and build trust through more equitable communications.
